

# Bug Hunt 101 — OWASP Juice Shop

Name: Naitik Soni

Environment: Localhost Lab

## Vulnerability 1 — Reflected XSS

Payload: `<script>alert('Naitik')</script>`

Impact: JavaScript execution in browser.

## Vulnerability 2 — SQL Injection

Payload: `' OR 1=1--`

Impact: Authentication bypass.

## Vulnerability 3 — IDOR

Method: Basket ID manipulation in URL.

Impact: Unauthorized access to other users' baskets (lab demo).

## Conclusion

This project successfully demonstrates common web vulnerabilities in a controlled lab environment.
